

SCIENCE CLUB ACTIVITIES

As we live in an age of science, it is essential that students have a deep insight into the background of science. Science educators are now a day found to exhibit growing interest and means of stimulating group participation and mobilizing interest in the learning of science. Through activities of science club, learning of science become joyful. The science club caters to the freedom of expression. The members organize lectures, seminars etc. and arrange visits to places of scientific interest.

Objectives of Science Club:

- *To develop in scientific temper in the students and society**
- *To inculcate scientific attitude and provide opportunities for training scientific method**
- *To develop interest in scientific hobbies**
- *To encourage individual and group activities**
- *To keep the students in touch with recent advances in science**
